

Eike Reich, Ph.D.

The HPTLC Association was founded in 2012 as a private, non-commercial and non-profit organization according to Swiss Law. The Association's goal is to promote the use of HPTLC in plant analysis and other analytical fields.

In May 2018 the Association elected a new Board of Directors:

President:

Eike Reich, Ph.D. (CH)

Chair Method Review Committee:

Maged H.M. Sharaf, Ph.D. (US)

Chair Advisory Board:

Prof. Salvador Cañigueral, Ph.D. (ES)

Chair HPTLC-Symposium:

Mr. Pierre Bernard-Savary (FR)

Australian Chapter:

Mr. Tom Sostaric (AU)

Treasurer:

Mr. Marcel Hug (CH)

Honorary President:

Prof. Beat Meier, Ph.D. (CH)

Advanced HPTLC Training

Early 2019, Mississippi, USA

In collaboration with the National Center for Natural Products Research.

OCTOBER 2018

The International Association for the Advancement of HPTLC

Over the next four years, the HPTLC Association plans to achieve the following goals:

1. Increase its global recognition and visibility.
2. Incorporate the collection of methods published on its website into the new "International HPTLC Atlas for Identification of Herbal Drugs (Atlas)" and add new methods.
3. Improve and expand existing HPTLC training materials.
4. Expand its worldwide HPTLC training offerings.

Working towards these goals, the Association has started to create new regional chapters (currently in North America and Australia) and is actively recruiting new members who are willing to contribute their expertise and time to the goals, either as a regular member or by joining its advisory board. The Association is seeking to further expand international collaborations through signing memoranda of understandings with interested parties, including governmental, industrial and academic institutions in different countries. This year, the projected Atlas has had a great start in securing operational collaborations in Thailand and India.

The next general assembly of the Association will be held during the International HPTLC symposium in Bangkok.
