

November 2009

**Autumn 2009 edition of CBS 103,
CAMAG Bibliography Service for TLC available**

The new edition of CAMAG Bibliography Service CBS 103 with 172 abstracts of recent publications, demonstrating the flexibility of Thin-Layer Chromatography/HPTLC is available for free from CAMAG. A hardcopy can be ordered through www.camag.com; articles and abstracts can be downloaded from the same website.

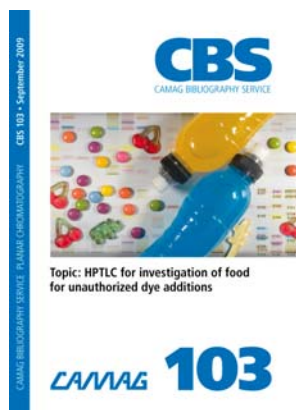

CBS 103 puts emphasis on HPTLC for investigation of food for unauthorized dye additions. Featured is for example HPTLC determination of illegal dyes in chili, paprika and curry.

The updated database Cumulative CBS 103 (complete collection of all past abstracts) is available for free from CAMAG's website following the link www.camag.com/CCBS. Currently the compilation includes nearly 10'000 abstracts of publications on TLC and HPTLC.

CAMAG is the leading solution provider for instrumental Thin-Layer Chromatography / HPTLC. Lab services include feasibility studies, development and validation of methods, contract analysis and training.
